

# Cell Preservation Solutions, LLC.

*Preservation Through Innovation™*  
A Wholly Owned Subsidiary of Lifeblood Medical, Inc.

## **Aedesta™ Cryopreservation Medium**

### **Eliminate DMSO from Cryopreservation**

- No Animal Serum
- No Animal Proteins
- No DMSO

### **Effective, Efficient Performance**

- Save time and steps
- No need to remove DMSO
- Move directly to downstream procedures

**Aedesta™ Cryopreservation Medium** was originally developed for organ preservation by Lifeblood Medical, Inc. as Lifor®. In order to apply the technology for cryopreservation, the Lifor® medium was optimized by Cell Preservation Solutions, LLC.

**Aedesta™ Cryopreservation Medium** is an optimized solution with the capability of cryopreserving tissue and cells without any cryoprotective additives. While cryopreserving, it is now possible to prevent the formation of ice crystals without the use of toxic DMSO.

Cell Preservation Solutions, LLC.
